Beyond Vision 2020 - Set Goals for the Decade

Dr. John Thie DC was a man of vision who in the 1970s stated that *Health Professionals have the responsibility to empower their clients* and he demonstrated what could be done with the Touch for Health Synthesis. In the 50 years since we have seen incredible changes in family life and there is a general climate of fear, anger and dissension in so many cities. Businesses run 24/7 and employees work long hours, eat pre-packaged convenience foods and have little time for rest, relaxation and recreation. Today, 90% of people die of chronic diseases related to stress and inflammation.

Medicine offers inadequate and at times dangerous solutions: e.g. like opioids for back pain. Opioid addiction is a long-lasting (chronic) disease that can cause major health, social, and economic problems. We have wonderful alternatives but we need to package them in a manner that people with no time and a short attention span can grasp, use and benefit from. We help them make positive, long-lasting changes in their lives. We can help people "find their magic" and leave the obstacles of the past behind them.

~ ~ ~ ~

Dr. Bruce Dewe MD is an active grandparent, international lecturer and Kinesiopractor®. Bruce has been a medical doctor for nearly 53 years and is a member of MICA, NZRK, AIMA, ATMS, and life member of AIK. He taught Anatomy at Auckland University, has been a hospital superintendent, practised industrial and family medicine and delivered over 1000 babies.

Bruce became a Touch For Health Instructor 1978 (and together with his wife, Joan, taught over 4,000 people TFH in 4 years). He is an Applied Kinesiology graduate 1981, was appointed first South Pacific Faculty Trainer for TFH 1981, Three-in-One Instructor 1982, Hypertonic Instructor 1983, Co-Founder PKP International 1983, Chairman of TFH International Faculty 1985, Trustee TFH Foundation, USA 1985, Founding Trustee of the IKC 1991, CAET 1999, was recognised as a Founding Father of Kinesiology in 2005 and Dip. Kinesiotherapeutic® 2006.

Dr. Dewe has the ability to put difficult concepts into simple, easily assimilated modules. This, with his entertaining style of presentation, has created a worldwide demand for his workshops that are taught in 16 countries & translated into nine languages.
